Institution: _____

Duration: 30 minutes

Total marks: 20

Q1. (Newton's Laws) Newton's Laws: Which statement best matches the learning objective 'Apply laws to real scenarios'?

A. Newton's Laws is unrelated to this syllabus

B. Newton's Laws represents the target concept for this question

C. Newton's Laws is only historical and not applicable

D. Newton's Laws cannot be explained with examples

Answer: Newton's Laws represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q2. (Kinematics) Kinematics: Which statement best matches the learning objective 'Solve displacement and velocity problems'?

 A. Kinematics is unrelated to this syllabus

 B. Kinematics represents the target concept for this question

 C. Kinematics is only historical and not applicable

 D. Kinematics cannot be explained with examples

Answer: Kinematics represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q3. (Work and Energy) Work and Energy: Which statement best matches the learning objective 'Relate work done to energy changes'?

 A. Work and Energy is unrelated to this syllabus

 B. Work and Energy represents the target concept for this question

 C. Work and Energy is only historical and not applicable

 D. Work and Energy cannot be explained with examples

Answer: Work and Energy represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q4. (Newton's Laws) Newton's Laws: Which statement best matches the learning objective 'Apply laws to real scenarios'?

 A. Newton's Laws is unrelated to this syllabus

 B. Newton's Laws represents the target concept for this question

 C. Newton's Laws is only historical and not applicable

 D. Newton's Laws cannot be explained with examples

Answer: Newton's Laws represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q5. (Kinematics) Kinematics: Which statement best matches the learning objective 'Solve displacement and velocity problems'?

 A. Kinematics is unrelated to this syllabus

 B. Kinematics represents the target concept for this question

 C. Kinematics is only historical and not applicable

 D. Kinematics cannot be explained with examples

Answer: Kinematics represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q6. (Work and Energy) Work and Energy: Which statement best matches the learning objective 'Relate work done to energy changes'?

 A. Work and Energy is unrelated to this syllabus

 B. Work and Energy represents the target concept for this question

 C. Work and Energy is only historical and not applicable

 D. Work and Energy cannot be explained with examples

Answer: Work and Energy represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q7. (Newton's Laws) Newton's Laws: Which statement best matches the learning objective 'Apply laws to real scenarios'?

 A. Newton's Laws is unrelated to this syllabus

 B. Newton's Laws represents the target concept for this question

 C. Newton's Laws is only historical and not applicable

 D. Newton's Laws cannot be explained with examples

Answer: Newton's Laws represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q8. (Kinematics) Kinematics: Which statement best matches the learning objective 'Solve displacement and velocity problems'?

 A. Kinematics is unrelated to this syllabus

 B. Kinematics represents the target concept for this question

 C. Kinematics is only historical and not applicable

 D. Kinematics cannot be explained with examples

Answer: Kinematics represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q9. (Work and Energy) Work and Energy: Which statement best matches the learning objective 'Relate work done to energy changes'?

 A. Work and Energy is unrelated to this syllabus

 B. Work and Energy represents the target concept for this question

 C. Work and Energy is only historical and not applicable

 D. Work and Energy cannot be explained with examples

Answer: Work and Energy represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.

Q10. (Newton's Laws) Newton's Laws: Which statement best matches the learning objective 'Apply laws to real scenarios'?

 A. Newton's Laws is unrelated to this syllabus

 B. Newton's Laws represents the target concept for this question

 C. Newton's Laws is only historical and not applicable

 D. Newton's Laws cannot be explained with examples

Answer: Newton's Laws represents the target concept for this question

Explanation: The correct option directly aligns with the topic objective and required concept.
